Clinical Validation of an AI-based approach to improve the shared decision-making process and outcomes in Breast Cancer Patients proposed for Locoregional treatment

Fact Sheet

HORIZON-HLTH-2021-DISEASE-04-04 - Clinical validation of artificial intelligence (AI) solutions for treatment and care

Project description

DE EN ES FR IT PL

Predicting the aesthetic outcome of breast cancer surgery

Treatment of breast cancer usually involves surgery that varies depending on the individual tumour, the size and shape of the breasts or personal wishes. Breast-conserving surgery and mastectomy with or without breast reconstruction or lymph node removal are among the available options. Additionally, radiotherapy can be applied to optimise locoregional control. However, there is currently no way of recapitulating the aesthetic outcome following locoregional treatments for breast cancer. The EU-funded CINDERELLA project proposes to create an easy-to-use application based on AI that uses a clinical database and performs picture and biometric matching to create images that simulate to the patient the outcome of surgery. The platform called CINDERELLA APProach will reinforce the role of the patient in clinical decision-making.

Cataract Simulator Diagnostics Device Development Using Computational Holographic Displays

Fact Sheet

HORIZON-EIC-2021-TRANSITIONCHALLENGES-01-01 - Medical Technology and Devices: from Lab to Patient

Project description

DE EN ES FR IT PL

Computational holography to assist cataract surgery

A cataract is a cloudy area in the lens of the eye causing blurry or distorted vision. Cataracts are common in the ageing population and can only be removed with surgery where the cloudy lens is replaced with an artificial one. To predict the outcome of surgery, the KATSIM project, funded by the European Innovation Council, proposes the development of a computational holography approach to simulate vision in patients with cataract. KATSIM will develop the first cataract simulator that will allow clinicians to choose the right replacement lens for each individual patient.

SPECIFIC OBJECTIVES

Cluster Health

CLUSTER 1. Health

*Improving and protecting the health of citizens at all ages, by developing innovative solutions to **prevent, diagnose, monitor, treat and cure** diseases; mitigating health risks, protecting populations and promoting good health; making **public health systems** more cost-effective, equitable and sustainable; and supporting and enabling patients' participation and **self-management**.*

Areas of intervention

- Health throughout the life course
- Non-communicable and rare diseases
- Tools, technologies and digital solutions for health and care, including personalised medicine
- Environmental and social health determinants
- Infectious diseases, including poverty-related and neglected disease
- Health care systems

Innovative Health Initiative

What are the objectives, expected impacts and scope?

innovative health initiative

Partnership:

EU and health related industries (such as pharmaceuticals, diagnostics, medical devices, imaging, biotech and digital industries) • European **collaborative platform** for **precompetitive and integrative R&I**.

Overall objective:

Accelerate the development of **safer** and **more effective innovative healthcare interventions** that respond to **unmet public health needs**, and that can be taken up by healthcare systems.

Specific objectives:

• Facilitate **technology integration** to: progress disease understanding; enable the delivery of innovative health products and services; enable the combination of innovations along the healthcare pathway; overcome barriers to digitalisation, via standards, interoperability, etc. • Contribute to methodologies for **better assessing the value** of innovative interventions.

Expected impacts:

• Contribute to the **sustainability of the healthcare systems** • **Faster time-to-market** for innovative products • **New business** models • Incentive for industry to invest in **unmet public health needs** • Facilitate the delivery of **cost-effective** interventions • Improved **health outcomes** • Cross-sectoral industry **collaborations.**

IHI – EU PPP Partnership

- **IHI call 3 (single stage call)** *Publication: 13 December 2022 | Deadline: 15 March 2023*
  - **Topic 1**: Screening platform and biomarkers for **prediction and prevention of diseases** of unmet public health need
  - **Topic 2**: **Patient generated evidence** to improve outcomes, support decision making, and accelerate innovation
  - **Topic 3**: Combining hospital interventional approaches to **improve patient outcomes and increase hospital efficiencies**
  - **Topic 4**: Strengthening the European ecosystem for **Advanced Therapy Medicinal Products** (ATMPs) and other innovative therapeutic modalities for rare diseases
  - **Topic 5**: Digital health technologies for the **prevention and personalised management of mental disorders** and their long-term health consequences
- **IHI call 4 (two stage call)** *Publication: 17 January 2023*
  - **Topic 1:** Expanding translational knowledge in minipigs: a path to **reduce and replace non-human primates** in non-clinical drug safety assessment
  - **Topic 2**: Patient-centric blood sample collection to enable **decentralised clinical trials and improve access to healthcare**

The THCS partnership; common vision

To lay the ground to provide high-quality, fairly accessible, health promoting and resilient health and care services at affordable prices to all European citizens in a way that is sustainable for the public finances.

- **General objective:** *to ensure the transition towards more sustainable, resilient, innovative and high quality people-centred health and care systems.*

- a partnership approach will give the necessary framework conditions to address :
  - gaps in research and innovation,
  - In knowledge translation,
  - implementation and scaling and
  - strengthen the research and innovation capacity in this field.

- the regional dimension is relevant and important for H&C systems in Europe, and for this partnership
- Co-funded partnership, Duration – 7 years, WP year – 2022, Start year – 2023.
- **Funding:** financial & in-kind contributions, EC co-funding – 30%.

European Partnership for Personalised Medicine

The partnership aims to **coordinate research in personalized medicine between the EU, EU countries and regions**.

Aims:

- faster **uptake of research and innovation results into clinical practice**, secure Europe's position in state-of-the-art healthcare provision.
- facilitate a shift from a 'one size fits all' approach towards taking into account **individual differences and better utilizing the accumulating data** to manage health, disease and its predisposition.
- sustainable **health systems and independence in data** intensive healthcare.

Under preparation! 2023

European Partnership on Rare Diseases

The partnership **will coordinate national, local and European research and innovation programmes**, combining research funding and implementation of research supportive activities such as training, data access infrastructures, data standards etc.

The main goal is to **improve the life of patients with rare diseases by developing diagnostics and treatments for rare diseases through multidisciplinary research and innovation programmes with all relevant stakeholders**. This will increase impact and uptake of research results as well as increase the visibility of EU leadership in rare diseases research.

Under preparation! 2023

MISSIONS

MISSIONS

Mission means a **portfolio of excellence-based and impact-driven R&I actions across disciplines and sectors**, intended to:

- achieve, ***within a set timeframe***, **a measurable goal that could not be achieved through individual actions**
- have ***impact on society and policy-making*** through science and technology
- be ***relevant for*** a significant part of the European population and a wide range of ***European citizens***

Mission areas

Adaptation to climate change, including societal transformation

Cluster 5, Cluster 2

Healthy oceans, seas, coastal and inland waters

Cluster 6

Cancer

Cluster 1

Climate-neutral and smart cities

Cluster 5

Soil health and food

Cluster 6

MISSION – BUDGET

1. There is **no fixed budget** for each mission

2. During the **first three years** of the programme, a **maximum of 10%** of the annual budget of **Pillar II** shall be programmed through specific calls for implementing the missions

3. For the remaining part of the programme, and **only after a positive assessment** of the mission selection and management process, this **percentage may be increased**
4. ***Ad how work programme (different from Cluster 1)***

MISSION CANCER

Conquering Cancer: Mission Possible **13 recommendations**

Targets by 2030: **more than 3 million lives saved, living longer and better**: achieve a thorough **understanding** of cancer, **prevent** what is preventable, optimize **diagnosis and treatment**, support the **quality of life** of all people exposed to cancer, and ensure **equitable access** to the above across Europe.
